

The graph displays the relationship between the number of sweeps and the dimensionality of the model. The x-axis represents the number of sweeps, ranging from 2 to 10. The y-axis represents an unlabeled metric. A legend identifies the dimensions for each data point: 100, 200, 300, 400, 500, 600, 700, 800, 900, and 1000. The cyan line with markers and error bars shows a decreasing trend, starting at a high value for sweep 2 and gradually decreasing as the sweep number increases.

Sweep	Dimension	Value (approx.)
2	1000	0.85
3	1000	0.75
4	1000	0.70
5	1000	0.68
6	1000	0.65
7	1000	0.63
8	1000	0.61
9	1000	0.60
10	1000	0.59
